Wenn man bedenkt, dass unser Unternehmen seit fast 100 Jahren besteht, ist es eine Untertreibung zu sagen, dass wir eine Leidenschaft für Teppiche haben. Teppich verleiht den Räumlichkeiten buchstäblich und im übertragenen Sinne Wärme. Er verbessert die Luftqualität und die Akustik. Die Tatsache, dass es sich auch positiv auf Ihre Energierechnung auswirkt, ist ein willkommenes Extra. Wir liefern Qualitätsprodukte mit jahrelanger Lebensdauer, aber eines Tages wird der Teppich ersetzt. Und was dann ?

Wenn jeder seinen Beitrag leistet, werden wir es schaffen ! In den letzten Jahren haben wir viel investiert in Recycling und Ökologie. Wir sprechen hier nicht über Produktion, Energie oder Abfallströme, da wir in diesen Bereichen zu den Pionieren der Branche gehörten, sondern über die Produkte.

Die Qualitäten **Jade**, **Fame** und **Midori** in diesem Koffer wurden innerhalb der Marke **ensō** entwickelt und verfügen über folgende zusätzliche Stärken:

Kostengünstiges Upcycling

Alle Komponenten der Qualitäten bestehen aus der gleichen Gruppe von Thermoplasten, was bedeutet, dass sie ohne zusätzliche Bearbeitung oder Komponententrennung problemlos zu hochwertigem Material recycelt werden können.

Recycler Inhalt

Die Qualität **Midori** besteht zu 100 % aus recyceltem Material, **Jade** und **Fame** aus teilweise recyceltem Material.

Komfort

Der schöne Filzrücken sorgt nicht nur für einen besonders angenehmen Gehkomfort, sondern verbessert auch die akustischen Eigenschaften.

Kosteneffizienz

Der **ensō**-Rücken ist zu 100% schnittfest, wodurch der Teppich nicht nur schnell und einfach verlegt werden kann, sondern die Qualitäten auch ohne zusätzliche aufwendige Nachbearbeitung als fertige abgepasste Teppich zugeschnitten werden können.

nl Ensō

Gezien ons bedrijf bijna 100 jaar bestaat is zeggen dat wij gepassioneerd zijn door tapijt een understatement. Tapijt voegt letterlijk en figuurlijk het warmtegevoel toe aan een ruimte en zorgt voor een betere luchtkwaliteit en akoestiek. Dat het ook nog een positieve invloed heeft op uw energiefactuur is mooi meegenomen. Wij kunnen zorgen voor kwalitatieve producten die jaren meegaan maar op een dag wordt het tapijt toch vervangen. Wat dan ?

Als iedereen zijn steentje bijdraagt komen we er ! Wij hebben de laatste jaren enorm ingezet op recycling en ecologie en wel in de breedste zin van het woord. We gaan het hier niet hebben over productie, energie of afvalstromen, want daar waren we één van de pioniers in de industrie, maar wel over de producten.

De kwaliteiten **Jade**, **Fame** en **Midori** in deze koffer zijn binnen het **ensō** programma ontwikkeld en hebben volgende extra troeven:

Low cost upcycling

Alle componenten van kwaliteiten bestaan uit dezelfde groep thermoplasten wat betekent dat ze zonder extra handling of componentscheiding eenvoudig gerecycleerd kunnen worden in hoogwaardig materiaal.

Recycled content

De kwaliteit **Midori** bestaat uit 100% gerecycleerd materiaal, de kwaliteiten **Jade** en **Fame** uit gedeeltelijk gerecycleerd materiaal.

Comfort

De mooie viltrug zorgt niet alleen voor een extra aangenaam gevoel als je op het tapijt loopt, hij versterkt ook de akoestische eigenschap.

Cost efficient

De **ensō** rug is 100% snijvast wat betekent dat het tapijt niet alleen snel en gemakkelijk te installeren is, de kwaliteiten kunnen ook zonder enige extra dure afwerking op maat gesneden worden als afgestemd tapijt.

La nostra azienda opera nel settore da quasi 100 anni, la moquette è ciò che conosciamo meglio. Le pavimentazioni tessili creano un ambiente confortevole, caldo e accogliente, migliorando anche la qualità dell'aria. I vantaggi non finiscono qui: favorendo l'isolamento termico, rendono anche meno onerose le bollette. Forniamo moquette che durano molti anni, ma cosa succede quando è ora di sostituirle ?

Negli ultimi anni abbiamo concentrato le nostre ricerche sulle possibilità di riciclo ed ecologia nel più ampio senso del termine. Siamo stati pionieri nell'individuare le migliori tecniche di produzione, gestione dell'energia e gestione delle rimanenze, per cui adesso vorremmo concentrarci sul prodotto.

Gli articoli **Jade**, **Fame** e **Midori** contenuti in questa valigia sono stati sviluppati sotto il brand **ensō** e si caratterizzano per i seguenti punti di forza:

Riciclaggio a basso costo

Tutti i componenti degli articoli sono costituiti dallo stesso gruppo di termoplastiche, il che significa che possono essere facilmente riciclati in materiale di alta qualità senza ulteriori manipolazioni o separazione dei componenti.

Contenuto riciclato

La qualità **Midori** è composta al 100% da materiale riciclato, **Jade** e **Fame** da materiale parzialmente riciclato.

Comfort

Il bellissimo sottofondo in feltro non solo offre una sensazione di comfort extra quando si cammina sulla moquette, ma ne migliora anche le proprietà acustiche.

Efficiente dal punto di vista dei costi

Il sottofondo **ensō** è al 100% a prova di taglio, il che significa che la moquette non solo è facile e veloce da installare, ma può anche essere tagliata a misura come tappeto finito senza ulteriori finiture.

en Ensō

Considering our company has been around for almost 100 years, to say we are passionate about carpet is an understatement. Carpet literally and figuratively adds warmth to a room and improves air quality and acoustics. The fact that it also has a positive impact on your energy bills is a nice bonus. We can provide quality products that last for years but one day the carpet will be replaced. What then ?

If everyone does their bit, we will get there ! In recent years, we have put a lot of effort into recycling and ecology, in the broadest sense of the word. We're not going to talk about production, energy or waste streams here, because we were one of the pioneers in the industry in those areas, but rather about the products.

The qualities Jade, Fame and Midori in this suitcase were developed within the ensō brand and have the following additional strengths:

Low cost upcycling

All components of the qualities consist of the same group of thermoplastics which means they can be easily recycled into high-quality material without additional handling or component separation.

Recycled content

The Midori is made of 100% recycled material, Jade and Fame are made of partially recycled material.

Comfort

The beautiful felt backing not only provides an extra comfortable feeling when walking on the carpet, it also enhances the acoustic property.

Cost efficient

The ensō backing is 100% cut-proof which means that the carpet is not only quick and easy to install, the qualities can also be cut to size as a finished rug without any additional expensive finishing.

fr Ensō

Si l'on considère que notre entreprise existe depuis près de 100 ans, dire que nous sommes passionnés par la moquette est une évidence. Au sens propre comme au sens figuré, la moquette apporte de la chaleur à une pièce et améliore la qualité de l'air et l'acoustique. Le fait qu'elle ait également un impact positif sur vos factures d'énergie est un bonus appréciable. Nous offrons des produits de qualité durables, mais un jour, la moquette sera remplacée. Et que se passera-t-il alors ?

Si chacun s'y met, nous y arriverons ! Ces dernières années, nous avons fait beaucoup d'efforts en matière de recyclage et d'écologie, au sens le plus large du terme. Nous n'allons pas parler de production, d'énergie ou de flux de déchets, car nous avons été l'un des pionniers de l'industrie dans ces domaines, mais plutôt de produits.

Les qualités Jade, Fame et Midori présentées dans cette valise ont été développées dans le cadre de la marque ensō et présentent les atouts supplémentaires suivants:

Recyclage à faible coût

Tous les composants des qualités sont constitués du même groupe de thermoplastiques, ce qui signifie qu'ils peuvent être facilement recyclés en matériaux de haute qualité sans manipulation supplémentaire ni séparation des composants.

Contenu recyclé

La qualité Midori est composée à 100 % de matériaux recyclés, Jade et Fame de matériaux partiellement recyclés.

Confort

Le magnifique dossier en feutre offre non seulement une sensation de confort supplémentaire lorsque l'on marche sur la moquette, mais il améliore également les propriétés acoustiques.

Économique

Le support ensō est 100% résistant à la découpe, ce qui signifie que la moquette n'est pas seulement rapide et facile à installer, mais que les qualités peuvent également être découpées sur mesure pour obtenir un tapis fini sans aucune finition supplémentaire coûteuse.
